EDUCATION

Borough of Manhattan Community College - New York, NY

December 2016

A.S in Computer Science

Bronx High School of Science Alumni – Bronx, NY

June 2014

EXPERIENCE

Get The Interview.AI, Founder - New York, NY

October 2025 - Present

- Solo built and deployed agentic AI systems leveraging LLM agents, RAG pipelines, and evaluation frameworks to automate complex workflows with deterministic and dynamic auditable execution.
- Orchestrated distributed Cloud Run workflows with agent-based systems for reproducible, fault-tolerant LLM-driven pipelines
- Developed Node.js orchestration layer integrating Gemini, DeepSeek, and Hyperbrowser/Playwright agents for autonomous document generation and form interaction.
- Deployed full-stack Next.js platform with Stripe, OAuth, and Firestore/GCS on GCP for secure lifecycle management
- Integrated AI-assisted development tools (GitHub Copilot, Claude Code) for multi-file reasoning, debugging, and system design.
- Implemented evaluation and monitoring loops for LLM output scoring, reliability tracking, and failure recovery.

Ticketmaster, Senior Software Engineer - New York, NY

September 2024 – Present

- Led development of high-traffic React.js + TypeScript ticketing interfaces, improving page load times by 35% and reducing render latency by 40%, supporting highly scalable, high-availability customer-facing systems.
- Architected production-grade AI integration pipelines for frontend and backend systems, ensuring deterministic execution, auditability, and compliance with enterprise reliability standards.
- Tuned and operated Dockerized microservices on AWS (EC2, S3, Lambda) orchestrated via Kubernetes, optimizing resource allocation, autoscaling policies, and deployment pipelines to support fault-tolerant architectures.
- Owned CI/CD and production observability using Jenkins + Datadog, shortening deployment cycles by 50%, improving incident recovery time, and contributing to anomaly detection across high-volume metrics.
- Led team adoption of agentic and AI-powered development practices, mentoring engineers on safe, explainable, and compliant use of LLMs within regulated production environments. Integrated Claude Code and prompt-engineering workflows to accelerate development, automate documentation, and reduce average development cycle time by 60%.

IDEMIA, Full Stack Developer - Remote

April 2022 – September 2024

- Developed asynchronous [Node.JS](#) microservices for identity verification, integrating Apache Kafka for event-driven communication, improving API response times and throughput while ensuring reliable message delivery under high load.
- Deployed containerized microservices via Kubernetes with autoscaling policies that dynamically scaled on demand, cutting idle server usage to zero and reducing infrastructure costs by 35% while streamlining CI/CD and resource allocation
- Maintained Angular codebases and leveraged modern asynchronous processing techniques, reducing average page load times by 35% and improving user interaction responsiveness by 40%.
- Expanded biometric capabilities by designing and integrating a new API flow supporting palm-print matching, extending the facial recognition pipeline to multimodal identity verification and increasing system coverage by 25%.

ZenKey, Full Stack Developer - Remote

March 2019 – March 2022

- Implemented a custom OAuth2 authentication framework using Java Spring Boot and JWT with Java KeyStore for secure, carrier-grade identity validation.
- Developed Angular and Node.js customer portals integrating REST APIs for real-time identity verification.
- Automated CI/CD pipelines with Jenkins and testing frameworks (JUnit, Mockito) to ensure reliability.
- Maintained Sawtooth Blockchain API for immutable, auditable identity data management.

SKILLS

Languages: Java, x86Assembler, C, C++, JavaScript, HTML, CSS, Oracle SQL, Typescript, MySQL, PostgreSQL

Libraries/Frameworks: JDBC, JSP, Servlets, SpringBoot/Maven, Hibernate, AWS, RDS, React, Angular, Node.Js, Express, LLM Integration (OpenAI), RAG, Next.JS

Technologies: Selenium, Junit, Mockito, Datadog, Prompt Engineering, Jasmine, Amazon AWS, Google Cloud Services, Jenkins, Jira, Agile/Scrum, AWS, MongoDB, Claude Code, Github Copilot

Hobbies: Freelance programming; DJing and Music Festivals; Mixed Martial Arts; Multilingualist
